

The April birth flowers are the daisy and sweet pea. The daisy stands for innocence, purity, and true love. It is actually made up of two flowers. The center eye is a collection of tiny florets, while the ray floret (petals) radiates from the center, resembling the sun. Daisies have long been a symbol of true love because these two flowers work in perfect harmony.

Given their representation of love, innocence, and new beginnings, daisies have been linked to the Virgin Mary.

In addition to being a symbol of everlasting love, the diamond, April's birthstone, was once thought to bring courage. For centuries, the diamond was thought to possess healing powers and provide clarity and balance. Some ancient civilizations believed lightning formed diamonds, while others thought they were the tears of God.

Happy Anniversary to These Precious People:

April 3 is National Find a Rainbow Day!

MILES OF SMILES

*Have you ever seen a rainbow upside down?  
You see a big beautiful smile, not a frown.  
Separate the colors, put them end to end,  
And you'll have smiles for miles and miles.*
